

## RV10 Relief Valve

The RV10 safety relief valve is well-suited for overpressure protection of production equipment, including compressors, scrubbers, separators, pipelines or anywhere overpressure protection may be required.

The RV10 design incorporates a non-rising stem to give the disk full guidance while opening and closing. The non-rising stem coupled with the valve's soft-seat design ensures long lasting set pressure repeatability and bubble-tight shutoff. The shorter stem also makes the valve more compact, making it ideal for requirements where space may be an issue.

The RV10 is ASME certified for gas service and is available in NPT and flanged connections. Flanged sizes meet API 526 dimensions. The RV10 series covers set pressure ranges from 15 – 3000 psi (103-20684 kPa) with orifice sizes ranging from D to M. Orifice sizes exceed API minimum areas for increased flow rates.

The RV10 is manufactured in accordance with the ASME Boiler and Pressure Vessel Code, capacity tested and certified by the National Board, and meet the requirements of Section VIII, Division 1 of the ASME Code.

## Specifications

**Set Pressure Range:** 15 – 3000 psi (Varies by Model)

**Temperature Range:** -50° F to 400° F (-45° C to 204° C)

**Seat Tightness:** Meet or exceed API 527

**Materials:**

**Base:** ASME SA105, SA479 316, A350 LF2 (Low Temp Option)

**Body:** ASME SA216 WCB, SA352 LCB (Low Temp Option)

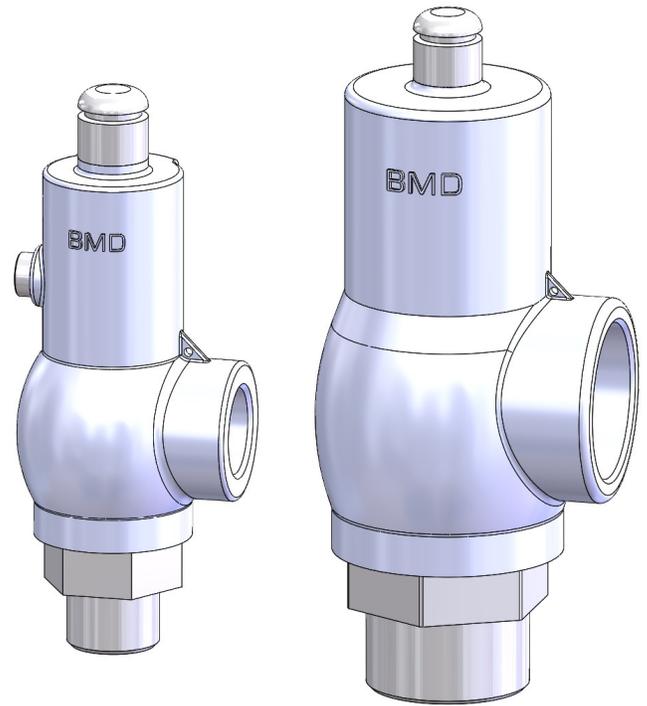

**Bonnet:** ASME SA216 WCB, SA352 LCB (Low Temp Option)

**Bolts:** ASME SA193 Gr B7

**Spring:** 17-7 Stainless (Standard), Inconel® X-750 (NACE)

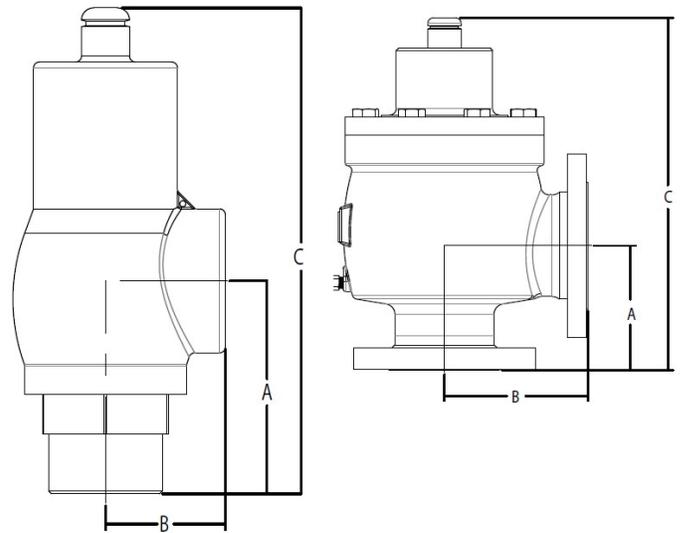

**Trim:** ASTM 304/316 Stainless

**Soft Seat:** Viton®, Carbon-Filled PTFE®, PEEK, Low-Temp HNBR

## Dimensions

Dimensions in inches.

See Tables 2 and 3 for Dimensions
